

INVITATION:

NORDIC AI & OPEN DATA HACKATHON

18-19 MARCH - 2022

We want YOU to join!

At this **24-hours Hackathon** we want you to put your technical skills and potential insights from the transport/mobility/climate area into play and demonstrate how digital solutions can help the Nordics become a leading region in digitalization, AI and responsible use of open data.

Access to a lots of open data across the Nordics!

We've been working on making strong data sets ready for you.

We have road camera data from all over the Nordics - and also weather- and air quality data. So it's your imagination and creativity that sets the limit for solutions on relevant challenges to solve! However we also have **pre-defined challenges that are presented - but if your idea goes beyond that's okay as well.** You can read more about it on the website.

Connect with industry- tech- & public partners

We will engage relevant industry- tech- and university partners from all over the Nordics. They will act as speakers, mentors and jury members. Hence the Hackathon is a unique opportunity for you to expand your network with lots of interesting profiles - and there is a **cash prize of 20.000 DKK** for the winning team and an acceleration package.

Nordic Innovation's AI and Data Program

The Hackathon is **part of Nordic Innovation's AI and Data program.**

One of the main target groups are innovative companies that can use public data to create new solutions with AI, hence we do hope we will see you during the Hackathon.

Visit our website and reserve your seat!

Visit: <https://www.nordicopendata.com/> to learn more and to register your team - or you as an individual. The Hackathon will **take place in Stockholm, Copenhagen and Online** on the same time. If any questions please reach out to Project Lead: Linda Pedersen (linda@happy42.dk).

Best Regards

Happy42, Rambøll & Nordic Innovation
